

Denver Energy Center Single Stream Recycle Program

SINGLE STREAM RECYCLING is All recycle in one trash can

No Styrofoam, Wood, Green Waste or Food Waste

BOXES

Please flatten boxes and mark them as “Trash/Basura” if you want them removed by the night crew. If they’re not marked as trash/Basura and flattened, the crew will not remove them.

Plastic Bags

Plastic bags cannot be recycled in this program. Please do not throw them in with your recycle, they damage the equipment at Waste Management.

Plastic bags can be recycled at grocery stores, Walmart stores and other retailer.

Trash cans and recycle cans

Trash cans and recycle bins are tenant responsibility to purchase.

KITCHEN Set up.

Wet trash, such as food, dirty containers and non-recycle items should be placed in a trash container with a liner. This will be the only trash can that will have a liner.

Recycle items go in the other trash can. Please empty liquids!

Denver Energy Center Single Stream Recycle Program

Desk side and all other trash cans

The larger can is for recycle items and will not have a liner provided and, liners should not be used. Liners indicate trash and any container with a liner will be thrown away s trash.

The “side saddle” blue container is for non-recycle such as apple cores, banana peels or anything that cannot be recycled. They can be purchased online and locally.

The emphasis here is that nearly everything should be recycled through the single stream program with minimal trash, so the trash container is the smallest piece.

Trash bags and grocery bags are not recyclable, please do not place in the recycle containers.

The cleaning crew will empty recycle and trash containers into a larger collection bin nightly.

Thank you for participating in the single stream recycle program!
